You Must Upload Data-Sets Before Beginning to Import

Data-sets have to be uploaded before they can be imported.

The instructions on how to upload data-sets, in SAS Studio/SAS OnDemand and WPS, are provided in the respective lectures/lessons that show you how to install and set-up each of these software solutions.

So, if you stopped watching the installation videos after you set up the actual software, just go all the way to the end of the videos to see how you can upload data-sets.

To make the experience quicker for you, those of you using SAS Studio/SAS OnDemand, go to 1:47 of the installation video, I cover how to upload data-sets starting at that time. For those using WPS, starting at 7:15 of the video.

Have fun learning!

Regards,

Ermin
